

We are looking for

- Toddlers between the ages of 18 and 48 months
- Families with concerns about:
 - Social development
 - Language skills
 - Play skills
 - Behavioral challenges

Participation involves

1- 4 visits each year over the course of three years, consisting of the following:

- Parent interviews
- Child cognitive and play-based assessments
- Child natural sleep MRI
- Yearly written summary report with results of testing

Do you want to learn more about your toddler's development?

The Autism Center at Child Mind Institute and the Center for Autism and the Developing Brain are conducting a study on the brain and behavioral changes of children over the first five years of life.

To learn more about the study, contact **autism.center@childmind.org** or call **646.681.8238 or 646.681.8237**
